Turn your desktop PC into your own surveillance system with this Q-See PC based security solution. The QSDT4PCRC PCI DVR Card uses software H.264 compression for maximum storage with little loss of quality. This DVR Card stores video directly on your PC hard drive, records real-time video for accurate monitoring, and offers multiple recording options including motion detection. Not only can you monitor remotely over the internet via Internet Explorer, but also monitor via cell phones with Win Mobile Pro and Symbian OS, iPhone/iPad, and on 3G/4G networks. This system supports up to 4 cameras.

Q-See solutions are the perfect answer for keeping your family secure, protecting your assets against theft, or managing your staff and resources more effectively. This easy to install complete security package has everything you need to setup a secure home or business. With Q-See, surveillance can be handled remotely - worldwide.
